- no calibration necessary
- 3D representation of the scans.

Simple for you  
and convenient  
for your patients.

Easy limb scanning with the Perometer.

# Well-established technology.

For over 25 years our products have been well established in the everyday medical practice.

We have earned the trust of physicians and clinic personnel in more than 20 countries worldwide.

All of our limb scan products are certified medical devices according to the European Medical Device Regulation 2017/745. At the core of all our devices is the Perometer technology, which has proven and continuously been refined for more than two decades.

Our high standards are guaranteed by a quality management system approved by the certification body in accordance to ISO 13485.

Certification body
